User Personas and Use Cases

Persona 1: Anna, Student & Member of Research Group

- **Demographics**:

  - **Age**: 21
  - **Occupation**: Full-time student at a university
  - **Role**: Member of a student research group
  - **Tech proficiency**: High – Uses multiple apps for academic and social purposes
  - **Goals**: Stay organized, manage academic responsibilities, collaborate with peers
  - **Challenges**: Struggles with keeping track of various events, deadlines, and group communications spread across different platforms.

- **Behavior & Needs**:

  - Anna requires a central platform that consolidates all her academic, research, and social information in one place.
  - She values staying up-to-date with group events, meetings, and deadlines, and needs reminders for upcoming events.
  - Communication within the research group is key to her productivity, and she prefers easy access to chat, file sharing, and event management features.

- **Why Anna Will Use the Product**:
  Anna will use the Organizer app because it simplifies communication and event management for her research group. The app will help her stay organized and avoid missing deadlines or meetings by providing real-time updates, notifications, and a central hub for all her academic-related activities.

Use Case 1: Anna – Joining Research Group & Staying Updated

- **Goal**: Stay organized with academic events and communicate with the research group.
- **Steps**:
  1. Anna opens the Organizer app.
  2. She searches for her research group and joins the group within the app.
  3. She receives notifications for upcoming events, meetings, and deadlines related to the group.
  4. Anna uses the built-in chat feature to communicate with group members and collaborate on tasks.
  5. As events are added to the group calendar, Anna is automatically updated with reminders.
- **Outcome**: Anna is always up-to-date with her research group's activities, ensuring she never misses important meetings or deadlines, and she can easily interact with group members to enhance collaboration.

Persona 2: Marcin, Aspiring Entrepreneur & Startup Founder

- **Demographics**:

  - **Age**: 28
  - **Occupation**: Founder of a newly established software development startup
  - **Role**: Team leader, managing multiple projects and a small team
  - **Tech proficiency**: Advanced – Experienced with project management tools and communication apps
  - **Goals**: Build a successful startup, manage team productivity, maintain clear communication
  - **Challenges**: Balancing multiple projects, ensuring team members stay on task, coordinating deadlines across different roles.

- **Behavior & Needs**:

  - Marcin needs a tool that allows him to effectively manage his startup's workflow, divide tasks, and ensure deadlines are met.
  - Communication among his team members is critical, so he requires a platform that facilitates seamless interactions.
  - As a startup founder, Marcin needs to juggle between various responsibilities and stay on top of his team's progress without getting overwhelmed by manual tracking.

- **Why Marcin Will Use the Product**:
  Marcin will use the Organizer app to streamline project management within his startup. By using the app, he can create projects, assign tasks, set deadlines, and keep track of his team's progress all in one place, allowing him to manage his startup more efficiently and reduce communication overhead.

Use Case 2: Marcin – Managing Startup Projects and Team Collaboration

- **Goal**: Efficiently manage tasks, deadlines, and team collaboration for his startup.
- **Steps**:
  1. Marcin opens the Organizer app and creates a new project for his startup.
  2. He invites his team members to join the project by sending them invites via the app.
  3. Marcin divides the project into smaller tasks, assigns them to specific team members, and sets clear deadlines.
  4. Each team member is notified about their responsibilities and deadlines.
  5. Marcin can track the team's progress and communicate through the app's chat feature.
  6. As deadlines approach, the app sends reminders to both Marcin and his team to keep tasks on track.
- **Outcome**: Marcin can manage his startup's tasks and team communication more effectively, ensuring that the team stays organized, tasks are completed on time, and the startup's projects progress smoothly.

Persona 3: Sophia, Freelance Event Planner

- **Demographics**:

    - **Age**: 35
    - **Occupation**: Freelance event planner, managing multiple events simultaneously
    - **Role**: Event organizer, responsible for event logistics, scheduling, and client communications
    - **Tech proficiency**: Moderate – Uses various productivity apps but prefers user-friendly interfaces
    - **Goals**: Organize events smoothly, keep track of multiple client needs, streamline communication with vendors and clients
    - **Challenges**: Managing multiple events at once, coordinating vendors, keeping clients updated, and managing changes to schedules.

- **Behavior & Needs**:

    - Sophia needs a reliable tool to keep track of her numerous events, timelines, and client communications in one place.
    - She wants an easy way to collaborate with vendors and clients to ensure the event runs smoothly.
    - Sophia is often multitasking, so she needs a solution that can provide reminders and updates in real time to prevent errors or missed tasks.

- **Why Sophia Will Use the Product**:
  Sophia will use the Organizer app because it will allow her to plan, organize, and communicate about events more effectively. With the ability to manage different aspects of events in one place, receive notifications about schedule changes, and collaborate with clients and vendors seamlessly, Sophia can increase her efficiency and reduce the stress of event management.

Use Case 3: Sophia – Managing Multiple Events and Clients

- **Goal**: Effectively plan and manage multiple events, while coordinating with clients and vendors.
- **Steps**:
    1. Sophia opens the Organizer app and creates a new event for each client.
    2. She adds details, such as dates, tasks, and vendor information, to each event.
    3. Sophia assigns tasks to vendors and communicates specific requirements through the app's chat feature.
    4. Clients are added to the events and receive updates on their event progress via notifications.
    5. As changes occur, Sophia can update tasks and notify all relevant parties, including clients and vendors.

6. The app sends reminders for key dates, deadlines, and event-specific tasks to all involved.

- **Outcome**: Sophia can effortlessly manage multiple events and clients, ensuring smooth execution, staying on top of every task and communication, and minimizing the chance of oversight.

Conclusion:

The *Organizer* app offers valuable solutions for users with different needs, from students like Anna who require academic organization and group collaboration to entrepreneurs like Marcin who need efficient project management for their startups. Additionally, professionals like Sophia can simplify the complexities of event planning, communication, and coordination. Each persona's goals and use cases highlight how the app can optimize time management, productivity, and collaboration across various fields.
